Butler Health System's flagship, Butler Memorial Hospital, opened its doors in 1898. For more than 100 years, Butler has remained an independent community hospital and has continued to grow to meet the needs of the community.

The 296 bed hospital, along with nearly 30 diagnostic testing locations, four urgent care centers and over 35 physician office locations in five counties comprise Butler Health System.

A new 210,000 square foot patient tower addition was completed in the summer of 2010 and features a state-of-the-art surgery wing, three floors of newly designed, private patient care rooms, along with a spacious and inviting lobby offering auditorium and classroom space for community events and training sessions.
